**SCRIBE POWERS INTEGRATION BETWEEN WENNSOFT
AND MICROSOFT DYNAMICS CRM**

*WennSoft integrates its Service Management Series with Microsoft's
marketing leading CRM Application using Scribe Insight*

BEDFORD, N.H. – Nov. 27, 2007 – Scribe Software, a provider of configurable data integration and migration software technology for leading enterprise business applications, announced that WennSoft® has developed an integrated solution between its Service Management Series and Microsoft® Dynamics™ CRM. WennSoft, a Microsoft Gold Certified Partner, is leveraging the Scribe Insight tool, extending their solutions' value by integrating critical customer information across the Dynamics product line.

"WennSoft solutions empower organizations engaged in field service to execute more efficiently and profitably," explains Julie West, WennSoft president/COO. "We were looking to expand our offering by bringing together sales, service and finance operations, providing a seamless experience throughout the customer lifecycle. With Scribe Insight, we were able to bring a solution to market quickly, using the tool of choice for the Microsoft Dynamics partner channel and customer base."

Scribe Insight utilizes a unique and open template model that enables Independent Software Vendors (ISVs) to quickly and efficiently build "out-of-the-box" integrations that can then be configured to meet the specific needs of each of their customers, all without having to write a single line of code.

"By selecting the Scribe Insight tool, WennSoft can leverage its purpose-built functionality to efficiently create integration solutions necessary to extend their product, saving their development staff time and money, but more importantly, enabling them to

stay focused on their core competency” states Peter Chase, executive vice president and founder, Scribe Software Corp.

WennSoft customers can now provide even better customer service by having access to key information at the point of customer interaction, and the Scribe Insight tool gives these customers the agility they need to adapt their integration processes as their business changes and grows.

About Scribe Software Corporation (www.scribesoftware.com)

Scribe Software Corporation provides data integration and migration software solutions to help people within an organization share customer data, to better focus – and take action – on critical business events. By helping everybody within an organization work as one, we help our customers sell more and provide better customer service. Scribe Software, founded in 1996, is a privately held corporation headquartered in Bedford, New Hampshire.

About WennSoft

WennSoft provides innovative business management solutions for both the public and private sector organizations focused on project management, field service and equipment/fleet management. Core products – Job Cost, Service Management Series and Equipment Management Series – integrate with Microsoft® Dynamics™ GP to deliver a unique solution to each vertical industry served.

The WennSoft solutions complement and enhance existing processes and the people who facilitate them – improving efficiency, expediting reporting and creating cost savings for our customers. To learn more about WennSoft and its solutions, visit www.wennsoft.com.
