

Scribe Insight Level 2 Training

Scribe Insight Level 2 Training

This course is designed for technical consultants or developers who implement integrations using Scribe Insight. Through instructor lead discussion and hands-on labs, the students will learn the best practices for building one-way and two-way integrations with Scribe Insight and Scribe Adapters. Students completing this course will have a thorough understanding of the integration design patterns and features Scribe uses when building its own integration templates with Scribe Insight. This is a full two day course.

The course is designed for students that have completed Scribe's certification training and familiarity with the Scribe Adapter for Microsoft Dynamics® CRM is highly recommended. Prior field experience implementing integrations with Scribe Insight will be helpful in understanding the concepts in this course.

The instructors will evaluate students by their participation and demonstration of proficiency with the lab exercises. Students who successfully complete the course will receive a certificate of advanced training from Scribe.

Requirements:

The training includes lab exercises in a Microsoft Virtual PC environment. Scribe will provide an external USB 2.0 hard drive for each student to use during the training course.

For use of the lab, the student must come with a laptop with Virtual PC 2007 installed. Virtual PC is available free from

Microsoft. The laptop must have a USB 2.0 port. For optimal performance, the laptop should have 4 GB RAM with up to 2 GB to allocate to the Virtual PC machine, and be running Windows XP Professional. Windows Vista can also be used.

Training objectives:

- Have a broader understanding of Scribe's capability and how to apply it to customer requirements

- Understand the best practices for configuring the Scribe Server and its database in the customer's environment

- Understand the best practices for building integrations with Dynamics CRM

- Understand the best practices for capturing changes in third party systems

- Understand commonly used integration design patterns

- Get hands-on experience with publishing changes from Dynamics CRM as XML messages

- Get hands-on experience building one-way and two-way integrations between Dynamics CRM and a sample ERP application

- Architecture overview for the Scribe integration template

Prerequisite:

- Scribe Certification Training for a Scribe Adapter

Training policies

Payment Policy

This class is \$1,495 per person, or \$1,195 per person when two or more consultants from the same company register. Training can be ordered online by visiting www.scribesoftware.com. To place an order for two or more, contact your Account Executive or sales@scribesoftware.com.

Cancellation Policy

No refunds will be given. Scribe reserves the right to cancel a class due to low registration. Should this occur, a credit will be issued for attendance in a future class.

Contact training@scribesoftware.com for additional information.
