

Training - Scribe Server

Scribe Server Training for Scribe Insight

This course is designed for a technical user who is responsible for configuring, monitoring, and maintaining integrations built on Scribe Insight. This person could be a Scribe reseller consultant or a Scribe customer. The main learning objectives for the course are the installation and configuration of the Scribe server and how to use the automation, administration, and business activity monitoring capabilities of the product. The course focuses 80% on administrative tasks and 20% on integration development tasks.

The course is delivered during a series of instructor-led Web meetings. The live sessions are offered once per month, or you may view recorded sessions at your convenience in our Scribe Community.

This class is \$695 per person.

Training topics include:

- A review of Scribe Insight architecture and services
- How to install and configure Insight and the associated services
- How to configure Scribe integrations to run automatically
- How to set up alerts and e-mail notification
- How to configure on screen reports with Data Views
- How to set up server remote access security
- How to create simple, one-way integrations
- Administration capabilities for integration processes, publishers and bridges, monitors, queues, files and services
- How to handle exceptions including notification and troubleshooting

Prerequisite:

Scribe Workbench Training
