

SCRIBE SOFTWARE

Data Integration, Accelerated.

FOR 20 YEARS, SCRIBE SOFTWARE HAS HELPED BUSINESSES AND PUBLIC SECTOR ORGANIZATIONS OF ALL SIZES INTEGRATE THEIR CRITICAL BUSINESS SYSTEMS AND DATA.

With more than 12,000 customer and 1,200 partners, Scribe is a leading provider of agile data integration software platforms that make even the most complex integration challenges simpler and faster to solve, whether they are in the cloud, on premises, or anywhere in between.

SCRIBE: YOUR TRUSTED INTEGRATION PARTNER

Businesses of all sizes, public sector organizations, VARs, systems integrators, software manufacturers, and SaaS providers all benefit from Scribe's software, services, and expertise. Businesses can take advantage of the connectivity our platforms provide to streamline front-office and back-office processes. VARs and systems integrators can leverage our platforms and our expertise in integration to rapidly configure and deploy integrations for their clients and to build profitable intellectual property or product/service offerings. Software manufacturers and SaaS providers can embed Scribe's integration platforms to quickly expand the connectivity of their own applications and extend their market reach.

INTEGRATION, REPLICATION, AND MIGRATION SOLUTIONS

Scribe's integration platforms are fast, flexible, and futureproof, allowing you to quickly integrate all your critical databases, cloud-based services, and business systems, such as CRM, ERP, and marketing automation systems. You can use Scribe for all your integration needs, including:

- ▶ **INTEGRATION** – Synchronize data in real-time across multiple applications
- ▶ **REPLICATION** – Copy data from source systems, transform it, and load it into a database or data warehouse for analysis by power users and business analysts.
- ▶ **MIGRATION** – Extract, transform, and load data an old application to new one or load production data to a test instance.

BENEFITS THAT SPAN THE ENTIRE INTEGRATION LIFECYCLE

Uniquely suited for today's fast-paced businesses, Scribe's integration platforms allow you to configure complex integrations in less time and with limited budgets and small IT staff. Plus Scribe's platforms help your CRM, ERP, and other IT projects succeed by giving you advantages across the entire integration lifecycle, including the design, build, deploy, run, and adapt stages.

BENEFITS OF SCRIBE INTEGRATION

Our data integration platforms are fast, flexible, and futureproof. They allow you to create powerful, customized integrations faster than ever before. With Scribe you can.

Reduce Costs:

Cut the cost of developing and maintaining integrations with our visual, drag and drop tools. Organizations have reduced development costs by 70% or more using Scribe.

Reduce Time to Deployment:

With Scribe, organizations have reduced initial and ongoing development time by more than 90% compared to writing custom code to specific application programming interfaces.

Adapt More Quickly:

Instantly adapt to continually changing applications and integration requirements.

Automate Manual Processes:

Reduce & eliminate manual data entry, errors & customer service issues.

Improve Customer Service:

Give your services team instant access to the data they need so they can resolve customer issues on the spot.

Enhance Reporting:

Provide more timely access to key business data for reporting & analytics across the organization.

Make Better Decisions:

Deliver integrated & consistent data across the business, empowering users to “trust” the data to make better decisions faster.

PARTNER OPPORTUNITIES

Our partner programs empower systems integrators, solution developers, resellers, and SaaS providers/ISVs to build profitable products and services around data and application integration – even if you don't have years of integration experience. Our partner programs are easy to join and low risk and provide superior customer service, advanced technical support, and co-marketing and sales opportunities. White-label and OEM options are also available.

Our graphical development environments are “self documenting” and allow business analysts, not just developers, to create applications by clicking, not coding. In addition, Scribe's integration platforms offer full debuggers, collaboration features that allow you to better manage integration projects, and management consoles for tracking all your integrations.

These key features bring you lifecycle management benefits, such as:

- Shorter deployment time / faster time to market
- Lower total cost of ownership
- Faster response to run-time issues
- Staffing flexibility
- Reduced tracking and management of target applications
- Agile customization of integrations

PLATFORMS FOR ON-PREMISE CONTROL OR CLOUD CONVENIENCE

Scribe offers two integration platforms to suit your deployment needs. Scribe Online is a leading cloud-based integration platform that offers the convenience of a secure and multi-tenant cloud-based service that is available anytime and anywhere you have an internet connection. Meanwhile, Scribe Insight provides you additional control because it is deployed on your premises and offers a broad array of technology and application connectors to integrate your front-office and back-office business systems. Both platforms offer the power and agility to solve complex integration challenges and can integrate both cloud and on-premises systems and data.
