

Data Replication Made Easy

Copy, Archive and Analyze your Business Critical Data Quickly and Easily with Replication Services from Scribe Online

With any critical business system, such as Marketing Automation, CRM or ERP, you want to report, manage, integrate, and own your data without all the drama of large and costly IT projects or worse, manual processes that torpedo productivity and increase exposure.

You want to access your CRM, ERP, Marketing Automation and other business data quickly and easily and to control how, when and where you use it.

With Scribe Online Replication Services (RS), you can own your data and forget about those manual exports and imports! Secure and fast, you can replicate data anywhere you have MySQL, Oracle or SQLServer. Data is copied in entity format so you see information that makes sense, saving your IT team from having to write complicated queries to stitch the data together for you. Additionally, the replication is completely automated including scheduling options and auto-detection of changes. And it's all done through a simple, wizard.

Scribe Online RS makes reporting and business intelligence accessible for the masses.

“ If you're like me and you like to have your backups - this is the best product. Easy to set up, easy to use, best value for your money. “Just click a big green button” kind of app. Love it. ”

- Durrell Martin, Director of Special Projects, CTM Media Group, Inc.

Use Scribe Online RS to eliminate having to extract your data to CSV files or worrying about the impact to your cloud application performance with long running or poorly formed SQL queries! Your replicated data is in MySQL, Oracle or a SQL Server database so you can use it with all the popular reporting tools you already use every day.

Use Scribe Online RS to give your employees the data they need to do advanced analytics in a non-transactional environment that they can safely manipulate and access without impacting your production systems. Better analysis leads to better decisions!

Scribe Online Replication Services

- Replicate your CRM or Marketo data to a database. Take control of your data in the way you need it. Secure and fast, you can replicate your data anywhere your MySQL, Oracle or SQL Server is located – cloud, hosted, or on premise.
- Copy your data in an entity format so you see your information in a format that makes sense. Records like Accounts, Contacts, or Opportunities are presented as one entity. You don't need your IT person or a software engineer to build custom SQL views or write complicated SQL queries to stitch data together.
- Completely automate your replication. Scheduling options and auto-detection of field and record changes make it hands-off and worry-free. A simple, wizard based configuration gets you up and running in just minutes.

No Hardware, No Software, No Hassle

Scribe Online RS is a cloud-based service and requires no hardware or software to run. Upgrades are automatic and set up is a breeze with a wizard to guide you through it. Online videos, webinars and training are available if you need it. Sign up today and replicate tomorrow!
