

Scribe Platform API Connector

The Scribe Online Web API offers powerful functionality that allows you to control the platform externally, but you might not have the skill or the time required to write custom code to call the API. The Scribe Platform API Connector allows you to access the power of the Scribe Web API from within the familiar mapping environment without writing any code.

Building and deploying an integration between applications represents only the beginning of the integration lifecycle. Most integrations will be in place for years and will need ongoing monitoring, maintenance and updates along the way. The Scribe Platform API Connector helps you ensure that your integrations continue to serve their purpose with minimal ongoing effort.

You can use the Scribe Platform API Connector to:

- Ensure high availability of your critical integration processes
- Enable you to roll back to an earlier version of your integration maps
- Export your integration statistics for analysis
- Automate provisioning and user management

ACCESSIBLE TO BUSINESS ANALYSTS AND CONSULTANTS

Of course, all of this is possible through the Scribe Web API as well, but development resources are scarce in most organizations. The Scribe Platform API Connector enables business analysts and consultants to tackle these projects without help from a developer. It gives you access to the Scribe API in the familiar map design environment you use to build integrations.

scribessoft.com

Scribe is an established global provider of solutions that easily bring data anywhere it is needed – regardless of IT infrastructure. Scribe's award-winning products help 12,000 customers and 1,200 partners use data – cloud-based, on-premise or a mix – to increase revenue, provide superior service, and create business value faster.
