

Scribe Connector for XML

SCRIBEX

XML was once the lingua franca of data integration, and many legacy systems still use it to communicate with other systems. The Scribe Connector for XML allows you to integrate these systems with your CRM, financial and marketing systems using Scribe Online's intuitive graphical mapping tools.

THE SCRIBE CONNECTOR FOR XML:

- Understands the metadata in XML Schema Definition (XSD) files you provide for each type of record you're working with
- Supports hierarchical data
- Handles simple properties, complex properties and collections
- Writes XML files to the local file system where your Scribe Online agent resides
- Reads XML files from the local file system where your Scribe Online agent resides
- Optionally renames files that it has processed and moves them to a separate folder
- Renames files that have encountered an error

YOU CAN USE THE SCRIBE CONNECTOR FOR XML TO:

- Integrate data from a legacy system that does not have an API and does not allow access to its databases
- Migrate data from a legacy system into another database or application
- Read XML documents from an outside source and send them into a target application
- Get data from a source application and translate it into XML documents that an outside system can read

XML connections do not count toward the maximum number of connections allowed in your Integration Service tier.

scribsoft.com

Scribe is an established global provider of solutions that easily bring data anywhere it is needed – regardless of IT infrastructure. Scribe's award-winning products help 12,000 customers and 1,200 partners use data – cloud-based, on-premise or a mix – to increase revenue, provide superior service, and create business value faster. Its easy-to-use, enterprise-ready solutions are backed by extensive support options and training, and service customers across a wide array of industries including financial services, life sciences, manufacturing, and media and entertainment companies.
