BUSINESS BENEFITS

- Integrate applications that use an Oracle Database back end with CRM, ERP, or marketing automation apps
- Replicate data from your Salesforce or Dynamics 365 CRM system to an Oracle Database for backup or analytics
- Migrate data from an on-premise Oracle Database to the cloud

TECHNICAL BENEFITS

- Connect to Oracle Database 11g or 12c
- Authentication based on username and password
- Filter the list of tables when creating a connection
- Automatically discover tables, fields and data types
- Query, create, update and delete data
- Native query allows you to write your own free-form query to join tables, restrict source field lists, or customize the WHERE clause
- Process records in batches for higher performance
- Scalar functions and nonquery
