

LDAP Connector

The Lightweight Directory Access Protocol (LDAP) provides access to directories about people within corporations and other organizations. It allows enterprise IT departments to centralize information about people and permissions that many applications can use to determine who has access to what.

Scribe has partnered with CData, which offers drivers with connectivity to more than a hundred applications. This connector uses the CData driver for LDAP for read and write access to directories that use LDAP.

BUSINESS BENEFITS

- Sync information from a directory with leads and contacts in your CRM
- Use LDAP as a source to update users and permissions in another system, including Scribe Online
- Change or reset a user's password in an LDAP directory

TECHNICAL BENEFITS

- Authenticate via username and password
- Access LDAP objects like Group, Person and User
- Perform special operations such as Change Password and Reset Password
- Supports LDAP versions 2 and 3
- Supports secure connections
